Plate XXV. Blood Corpuscles destroyed by alcohol.

Plate XXVI. Tobacco Cancer caused by smoking.

Plate XXVII. Whose Many a Workman's Money Goes.

The average drinking man spends about \$100 a year for the habit. He has and he loses it. Why waste his money? He can get a man's strength in his own hands and his health in his own mind.

The average drinking man spends about \$100 a year for the habit. He has and he loses it. Why waste his money? He can get a man's strength in his own hands and his health in his own mind.

Annual consumption of liquors in the United States, 1,184,000,000 gallons.
Annual consumption of liquors per capita in the United States, 19.75 gallons.
Annual expenditure for liquors in the United States, \$1,200,000,000.00.

Annual expenditure per capita in the United States, \$20.00.
Annual number of deaths from alcohol, 100,000.
Number of habitual drunkards in the United States, 650,000.

Per cent of alcohol contained in each of the following drinks:	Per cent of alcohol contained in each of the following drinks:
Cider, 5 to 10	Port Wine, 15 to 20
Lager Beer, 5	Whisky, 45 to 55
"do", 5 to 20	Proof Spirit, 49
Wine, 8 to 22	Bitters, 5 to 6
Cin., 40 to 50	

Half the idiots in the world are the children of drunkards. More than half the insanity is due to alcohol, while it produces four out of every five of our paupers and nine out of every ten of the criminals with which our prisons are crowded, and the misery and wretchedness which it brings not only upon those who use it, but also upon their wives and children.
